REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

Any comments considered necessary by applicant must be submitted no later than the Payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

The references fail to neither anticipate nor suggest any reasons or motivations for one of ordinary skilled in the art to prepare the purified lysophosphatidylethanolamine product by the series of process steps. The series of steps includes the treatment of a mixture comprising phosphatidylethanolamine with lysophospholipid hydrolase for conversion to desired product that is purified with an extraction medium and crystallized at low temperature. It is noted that the PCT search report indicates that at least the broadest claim is anticipatory by Japanese reference which reference does not contain the same process steps as noted by the translated machine copy. The translated copy does not contain any of the claimed steps which includes the conversion step, extraction step as well as the precipitation step at -10 deg C or below to obtain a purified product. There is no anticipation by the reference as well as any motivation or suggestion for any purification of the lysophosphatidylethanolamine,

Thus, the processes as claimed are not considered predictable in view of the references of record and the instantly claimed inventions are unobvious and patentable over the references of record.
